Summary

AI/ML Engineering student with 4 months of industry experience developing Healthcare AI solutions involving NLP, OCR, Computer Vision, and Backend Development. Skilled in Python, FastAPI, Machine Learning, and Deep Learning, with experience building AI-powered systems for medical data processing and workflow automation.

Experience

Machine Learning Intern

Nov 2025 – Mar 2026

DrsMinds TruSignal Pvt Ltd

- Engineered automated Healthcare AI workflows to optimize data routing within Hospital Management Systems.
- Integrated AI models with backend services using Python and FastAPI.
- Developed and optimized data processing pipelines utilizing OCR and NLP for medical report text extraction.
- Performed model validation, testing, and deployment support activities.
- Collaborated with cross-functional teams to test, improve, and support deployment of AI healthcare applications.

Education

B.Tech (Artificial Intelligence and Machine Learning)

2022–2026

Amritsar Group of Colleges

Expected Graduation: 2026

Senior Secondary (12th Grade)

83.4%

Secondary (10th Grade)

76.2%

Technical Skills

Programming Languages: Python, C++, SQL, R

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, OCR, Generative AI

Backend Development: FastAPI, Django, Flask, REST APIs

Frameworks & Libraries: TensorFlow, Scikit-Learn, Hugging Face Transformers, PyTorch, Pandas, NumPy

Tools & Platforms: Git, GitHub, MongoDB, MySQL, Jupyter Notebook, VS Code

Certifications: Python, Flask & Django, SQL Micro Course, Power BI Micro Course, Data Science & NLP Bootcamp

Projects

Doctor AI – Multilingual Healthcare Assistant

- Developed a multilingual healthcare assistant integrating OCR, NLP, medical image analysis, and voice-based interaction.
- Built FastAPI-based backend services for AI model integration and healthcare workflow automation.
- Implemented multilingual support and intelligent medical report interpretation.

NLP-Based Intelligent Bot

- Developed a Django-based NLP platform supporting summarization, sentiment analysis, NER, and document processing.
- Implemented transformer-based NLP workflows using Hugging Face models for document analysis.
